

## RENTAL

Article: **HK46086-7-544**  
Line: **RENTAL LINE**  
Color: **black/silver**  
Sizes: **35 - 48 EUR**

Structure:

Netto: **1 969 gr**  
Brutto: **2 436 gr**  
(size EUR 42)

Width: **G**

### Description:

Resistant synthetic material and construction for increased lifetime, rapid fastening hooks for easy and rapid lacing and clear marking of size for easy orientation. The model is completed with BOTAS ICEHAWK skates with lightened construction with CARBON STEEL blades.

Cu rivets in heel.

### Technical parameters:

Recommended use:	special model for rental shops, free skating and recreational ice-hockey
Colours:	black/silver
Upper:	resistant synthetic in combination with PA fabric
Lining:	padded of synthetics suede
Padding:	DDP - foam latex and PE
Lacing rings:	Fe rings with pads and hooks with special treatment against corrosion
Tongue:	anatomic design
Sole:	reinforced, from tough and resistant plastic
Inner lining:	textile with elastic padding
Tip:	TST of original construction from special plastic resistant to impact
Blade:	BOTAS ICEHAWK Carbon Steel
Recommended care:	wipe clean after each use or wash lightly with water (no detergents!), remove insole and dry all at room temperature, occasionally conserve the blade of the skate.
Warning:	do not place close to heat sources, could result in damage or destruction!

## Used technologies:

### DDP-DOUBLE DENSITY PADDING

double density ankle padding.

### TST-TOTAL STABILITY TECHNOLOGY

Special purpose construction of toe cap from tough plastic to -20°C guarantees maximum protection of toes and increased working life.

### RAPID FASTENING HOOKS

rapid fastening hooks for easy and rapid lacing.

### CLEAR MARKING OF SIZE

clear marking of size for easy orientation.

### LTT-LAYERS THERMO TECHNOLOGY

Modern technology reinforcing upper for firm support and high degree of protection of foot - special manufacturing technology creates a tough and flexible upper resistant to impact and comfortable for the foot.

### PAS FIT

Proven anatomic support of ankle for maximum stability and transmission of energy to steel blade of skate, high degree of protection against impact. Special construction and technology creating a tough and flexible anatomically shaped heel and ankle part of upper with internal individually adapting soft padding, which ensures perfect grip and protection of foot.
